

Bale Gripper HD (Bale Handler)

OVERVIEW

The **Browns Heavy Duty Gripper** is designed to handle bales efficiently while minimizing the risk of accidental perforation. By gripping bales from both ends, where the plastic is thickest, the gripper ensures secure handling without damaging the bale material.

The bales are firmly held in place by two robust "T" frames, with one frame hydraulically pushed against the bale for added security. With three adjustable positions for the front arm and ram, the Heavy Duty Gripper is versatile enough to handle both round and square bales with ease.

FEATURES

- Heavy-duty construction designed to withstand the demands of modern telescopic handlers

- Smooth CHS “T” frames to prevent tearing of the bale wrapping
- Opening range: 1565mm, Closed position: 470mm for versatile bale handling
- Three adjustable positions for the front arm and ram to handle both round and square bales
- Supplied complete with rams, hoses, and couplings for easy setup
- Brackets sold separately for custom mounting options
- Working pressure should not exceed 200 bar for optimal performance
