

Grassland Renovator (slitter / harrow / seeder)

OVERVIEW

The renovator enables three operations to be performed in one pass for total rejuvenation of pasture land.

- The slitter aerates the pasture improving root development and relieving surface compaction.
- The harrow attachment helps prevent thatch and moss build up.
- Choose the Turbo Jet for reseeding / overseeding or the Fan Jet Pro for over seeding to repair damaged pastures.

Grassland is an important resource for the livestock farmer and maintaining high quality, low input and low cost grassland for grazing and/or grass feed is essential.
