

SuperGrab (bale handler)

OVERVIEW

The Supergrab is designed to handle round and square bales. It has 10 curved side tines that grab the bales and allow them to be rotated for vertical stacking.

The arms are controlled by two hydraulic rams to give a powerful grip and two conus 2 straight tines can be placed in the lower beam for extra support when handling Heston bales. All pivot points are bushed with grease nipples and hoses are supplied with the grab.

The grab can handle 2 round bales, 3 midi bales or 2 large Heston bales.

FEATURES

- 10 hardened curved tines.
- 2 conus 2 straight tines.
- 2 hydraulic rams.
- Bushed pivot points with grease nipples.
- Can handle 2 round bales, 3 midi bales or 2 large Heston bales.
