

Universal (Round & Square Bales)

OVERVIEW

The **Browns Universal Bale Grab** is designed to efficiently handle large bales by securely clamping the sides with a hydraulic ram. Its versatile design allows either arm to be locked in place, enabling operation with just one arm for added flexibility.

The clamping distance is fully adjustable, offering a wide range of movement. The grab can open up to 1800mm and close down to 730mm, making it ideal for handling various bale sizes with ease and precision.

FEATURES

- Large back frame designed to accommodate brackets for fitting any material handler

- Either arm can be locked, allowing operation with just one arm for added flexibility
- Adjustable clamping distance provides a full range of movement
- Opens to 1800mm and closes down to 730mm for versatile bale handling
- Longer arms available upon request for larger bales or specific applications
- Teeth grips available for handling waste bales effectively
- Supplied complete with ram, hoses, and couplings for easy setup
- Brackets sold separately for custom mounting options
- Working pressure should not exceed 200 bar for optimal performance
