

Grassmaster (Spring Tine Grass Harrow)

OVERVIEW

Grass harrows are effective for maintaining and rejuvenating existing pastures. The Browns Grassmaster removes dead grass, aerates the sward, helps prevent thatch and moss build up, encourages vigorous growth and breaks up/distributes manure and mole hills.

The Browns Grassmaster can be used in conjunction with an air seeder for over seeding existing pastures or reseeding new pastures.

Grassland is an important resource for the livestock farmer and maintaining high quality, low input and low cost grassland for grazing and/or grass feed is essential.

FEATURES

- Heavy duty frame
- 8mm oil hardened steel spring tines
- Four rows of tines

- Tines set 25mm apart
- Turnbuckle tine angle adjustment to adjust aggression of tines
- Mounted floating sub frames to follow the contours of the fields
- Spring dampers (anti-jiggle device)
- Two height adjustable pneumatic tyres (four as standard on 6m model)
- 5m and 6m models hydraulically folding

SPECIFICATIONS

Grassmaster 2m

Code	65745
Working_width	2065 mm
Transport_width	2065 mm
Parked_height	1650 mm
Length	1745 mm
Tines	80
Weight	280 kg
Depth Wheels	2
Frame	Rigid
Price	£2700.00

Grassmaster 3m

Code	65755
Working_width	2950mm
Transport_width	2950mm
Parked_height	1650 mm
Length	1745 mm
Tines	112
Weight	365kg
Depth Wheels	2
Frame	Rigid
Price	£3600.00

Grassmaster 5m

Code	65765
Working_width	4950mm
Transport_width	2500mm
Parked_height	2350mm

Length	1745mm
Tines	192
Weight	595kg
Depth Wheels	2
Frame	Hydraulically Folding
Price	£5975.00

Grassmaster 6m

Code	65776
Working_width	6145mm
Transport_width	2500mm
Parked_height	3000mm
Length	1745mm
Tines	240
Weight	630kg
Depth Wheels	4
Frame	Hydraulically Folding
Price	£6575.00
